Do you need to register multiple people for the conference?

Group all of the people that you are going to register that **have the same basic registration option**. The form automatically gives every additional registrant the same option as the first registrant. There is no way to change it.

1. Begin by entering the first registrant's email address and click "Next"
2. Choose the appropriate registration option and click "Next"
3. Fill out the information for the first registrant
4. Click the "Add Guest" button at the bottom of the page.
5. Enter the information for the second registrant and click "Done"
6. Repeat this process until all registrants have been added. (There is no limit to how many "guests" a registrant can have.) Click "Next" to proceed to payment information.

If necessary, create additional groups who share the same basic registration option (different from the first group) and follow the same process for the additional group/s.
